

Louis Bélanger B.Arch., OAA, MRAIC
Partner, YBSA

PROJECT ROLE: Partner-in-charge

Louis is a founding partner of the architectural firm of Yallowega Bélanger Salach Architecture. Fluently bilingual, Louis has developed relationships with the Francophone community. Louis' experience with leading large scale community projects in Greater Sudbury is unparalleled. With 30 years of in depth, hands on, local experience he brings strong leadership to the team. Mr. Bélanger has led the firm in meeting the needs of many clients across northeastern Ontario and is a vital leader on the firm's institutional design team. Louis has been the lead architect and project manager on many community minded projects such as the recently constructed Northern Water Sports Centre, Countryside Arena, Pioneer Manor, Elgin Street Greenway and St. Joseph Parking Lot Redevelopment at Bell Park. Louis' experience lends itself well to this type of project; his educational, cultural and institutional projects have all become landmarks and staples in our community.

Jason Philippe B.Arch., OAA, OAQ
Associate / Senior Architect, MTA

PROJECT ROLE: Senior Architect

In his 25-year career in architecture, Jason has participated on a full range of projects from small scale residential to large-scale institutional, cultural and urban planning projects as well as site management and even hands-on construction experience. Originally from Sturgeon Falls, Jason is fully bilingual Architect licensed in both Ontario (OAA) and Quebec (OAQ).

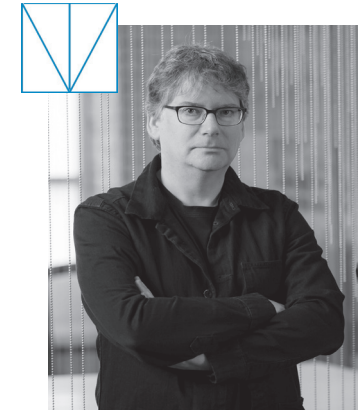

Since joining MTA in 2006, Jason has acted as Project Designer and Project Architect on a number of domestic and international projects. He thrives in a team environment and enjoys the collaborative processes. He is a natural leader with the unique ability to inspire and motivate those around him. Jason represented MTA as Project Architect on site in Jeddah, Saudi Arabia for the Comprehensive Master Plan of the Holy Cities of Makkah and Madinah as well as AlMashaer (holy sites where millions of pilgrims perform annual Hajj).

Amber Salach M.Arch., OAA, MRAIC
Partner, YBSA

PROJECT ROLE: Design Architect

Amber has proven project management skills and a strong design sensibility. Amber's roots are in Sudbury and she is passionate about designing community buildings, working with the public and various groups and stakeholders in Greater Sudbury. She thrives on creating beautiful and engaging public spaces for our community. This strong sense of community and love for bringing good design to Sudbury is showcased through not only her mindful design work, but also through her enthusiastic involvement in a number of municipal committees, volunteer work with various arts and culture groups and architectural jury work for various organizations. Amber has recent experience working on a number of community initiative projects, including being one of the lead design architects for the South End Community Library, the Makers Space located at the Main Library Branch, the Maison McCulloch Hospice and an extensive array of educational projects throughout Sudbury.

Brian Rudy B.Arch., OAA, NSAA, AIBC, AAA, FRAIC
Partner, MTA

PROJECT ROLE: Partner-in-Charge

Brian Rudy specializes in the planning and design of major institutional, corporate and cultural facilities. He was the Project Architect for the Canadian War Museum, winner of a Governor-General's Medal, where he expedited the delivery of a large, complex building under an extremely compressed schedule of 36 months from the start of design to occupancy. Brian was also the Project Architect for the Waterloo Region Museum, recipient of an OAA Design Excellence Award, and the Niagara Falls History Museum. He recently finished leading the design for the Etihad Museum in Dubai and the Discovery Science Centre in Halifax, Nova Scotia — an adaptive re-use of a former power plant turbine hall building. Brian started his career as a music composer and performer, so he has a strong appreciation for the performing arts.
